Subject: Virginia Slims SuperSlims

The tar and nicotine values that were included in the report I sent to you were based on a limited sample produced in October-November, 1989. We have resampled recent production and the overall tar and nicotine values for the Virginia Slims Superslims are 6.4 mg tar and 0.45 mg nicotine. After rounding, these numbers would be 6 mg tar and 0.5 mg nicotine.

We are in the process of resampling the market for this brand to obtain additional tar and nicotine deliveries.
